PROFESSIONAL SUMMARY

Data & Analytics professional and Applied AI Solutions Development student with 4+ years of experience building ETL/ELT pipelines, data models, BI applications, and cloud-oriented analytical systems. Strong in Python, SQL, Power BI, R Shiny, data validation, Git-based delivery, and translating operational requirements into reliable data products. Targeting Kinaxis' Data & Analytics co-op to support legacy modernization, data quality, and actionable business intelligence.

PROFESSIONAL EXPERIENCE

SierraCol Energy

Apr 2025-Present

Data Scientist

Bogota, Colombia

- Automated ETL/ELT pipelines that migrated and synchronized 400,000+ drilling-event records across OpenWells environments using Python, SQL, APIs, XML, and validation controls.
- Designed an AWS S3/EC2 and DuckDB analytical architecture and developed R Shiny applications for drilling, production, forecasting, and plan-versus-actual monitoring.
- Built curated datasets, reusable data models, feature-engineering workflows, cleansing routines, and error-handling checks using Python, R, and SQL.
- Modernized legacy Spotfire and Power BI workflows into centralized, containerized applications supported by Docker, Git, and CI/CD practices.
- Partnered with engineering, operations, and finance stakeholders to troubleshoot issues and deliver decision-ready analytical products.

Dapper Latam

Dec 2024-Mar 2025

Data Scientist

Bogota, Colombia

- Developed statistical models and automated data-preparation and reporting workflows for economic, financial, and regulatory analysis using R, SQL, and interactive applications.
- Designed scenario-analysis, sensitivity-assessment, and indicator-monitoring tools that converted business requirements into actionable outputs.
- Deployed containerized analytical applications using Docker, GitHub-based version control, and reproducible delivery workflows.
- Validated assumptions, explored patterns, and communicated results to business teams through clear dashboards and analytical narratives.

Procesos Inteligentes Ltda

Dec 2023-Mar 2024

BI Analyst

Bogota, Colombia

- Built healthcare cost-allocation models, KPI monitoring systems, and analytical applications using Power BI, R Shiny, SQL, KNIME, Python, PostgreSQL, and Snowflake.
- Optimized SQL queries and recurring analytical workflows to improve scalability, response time, and usability for business teams.
- Worked with multidisciplinary stakeholders to translate functional requirements into validated data models, dashboards, and automated reporting solutions.
- Performed data exploration, segmentation, quality checks, and visualization for operational, financial, and executive decision-making.

Anglo American

Nov 2021-Jan 2023

Data Scientist

Bogota, Colombia

- Developed mining operational-intelligence applications for production monitoring, time-series analysis, target deviation, and KPI tracking using R Shiny and SQL.
- Built interactive tools for trend exploration and early detection of operational variations in Docker-based deployment environments.
- Supported deployment, maintenance, troubleshooting, and iterative enhancement of analytical products with operational users and technical teams.

PROFESSIONAL EXPERIENCE - CONTINUED

Procesos Inteligentes Ltda <i>BI Analyst</i>	Feb 2021-Oct 2021 <i>Bogota, Colombia</i>
• Developed SQL and Python ETL processes, normalized relational databases, dashboards, and data-quality controls for operational reporting and business intelligence. • Automated recurring analytical workflows and API/CRM data flows to improve reproducibility and reporting efficiency. • Performed exploratory analysis, validation, and dashboard development for operational control and management reporting.	
Central Bank of Colombia <i>Intern, Econometrics Unit</i>	Jul 2020-Dec 2020 <i>Bogota, Colombia</i>
• Maintained R Shiny econometric applications and developed macroeconomic time-series visualizations, validation routines, and automated recurring reports. • Supported econometric research through data preparation, indicator monitoring, analytical validation, and reproducible report generation.	

EDUCATION

Applied AI Solutions Development, Ontario College Graduate Certificate George Brown College, Toronto, ON Relevant focus: data engineering, machine learning, big data, visualization, and portfolio development.	Expected Apr 2027
Postgraduate Program in Statistics Universidad Nacional de Colombia, Bogota, Colombia	Mar 2025
Bachelor of Economics Universidad Sergio Arboleda, Bogota, Colombia	Dec 2020

TECHNICAL SKILLS

Data Engineering & Databases: Python, SQL, R, ETL/ELT, Airflow, dbt, Spark, DuckDB, PostgreSQL, Snowflake, data modeling, data validation, cleansing, and error handling.

BI & Analytics: Power BI, R Shiny, Plotly, scikit-learn, forecasting, time-series analysis, feature engineering, model validation, backtesting, KPI design, and data storytelling.

Cloud & Software Delivery: AWS S3/EC2, Azure, REST APIs, Git/GitHub, GitHub Actions, CI/CD, Docker, Terraform, Ansible, and agile collaboration.

ADDITIONAL COURSES & CERTIFICATIONS

- Machine Learning II - Built content-based, collaborative, and hybrid recommender models from 20,000,263 ratings; achieved RMSE 0.8829 with Surprise SVD.
- Big Data Tools & Techniques - Applied Python, Spark, SQL, Arrow, and reproducible processing workflows to large datasets.
- Data Visualization Techniques - Developed interactive dashboards and visual narratives for stakeholder decision-making.
- Career Planning & Portfolio Development - Maintained a technical portfolio, GitHub repositories, and project documentation.
- Selected certifications: Azure Fundamentals; Associate Python Developer; Data Analyst in SQL; Data Engineer in SQL (DataCamp, 2024).
